Advanced Filtering

If you specify the region parameter, the regional release date will be used instead of the primary release date. The date returned will be the first date based on your query (ie. if a `with_release_type` is specified). It's important to note the order of the release types that are used. Specifying `2|3` would return the limited theatrical release date as opposed to `3|2` which would return the theatrical date.

AND / OR Logic

Also note that a number of filters support being comma (,) or pipe (|) separated. Comma's are treated like an `AND` query while pipe's are treated like an `OR`. This allows for quite complex filtering depending on your desired results.

Query Params

certification string
use in conjunction with `region`

certification.gte string
use in conjunction with `region`

certification.lte string
use in conjunction with `region`

certification_country string
use in conjunction with the `certification`, `certification.gte` and `certification.lte` filters

include_adult boolean Defaults to false | false |

include_video boolean Defaults to false | false |

language string Defaults to en-US | en-US |

page int32 -2147483648 to 2147483647 Defaults to 1 | 1 |

primary_release_year int32 -2147483648 to 2147483647

primary_release_date.gte date

primary_release_date.lte date

region string

release_date.gte date

release_date.lte date

sort_by string enum Defaults to popularity.desc | popularity.desc |
+ Show 14 enum values

vote_average.gte float
-3.402823669209385e+38 to 3.402823669209385e+38

vote_average.lte float
-3.402823669209385e+38 to 3.402823669209385e+38

vote_count.gte float

-3.402823669209385e+38 to 3.402823669209385e+38

vote_count.lte float

-3.402823669209385e+38 to 3.402823669209385e+38

watch_region string

use in conjunction with `with_watch_monetization_types` or `with_watch_providers`

with_cast string

can be a comma (`AND`) or pipe (`OR`) separated query

with_companies string

can be a comma (`AND`) or pipe (`OR`) separated query

with_crew string

can be a comma (`AND`) or pipe (`OR`) separated query

with_genres string

can be a comma (`AND`) or pipe (`OR`) separated query

with_keywords string

can be a comma (`AND`) or pipe (`OR`) separated query

with_origin_country string

with_original_language string

with_people string

can be a comma (`AND`) or pipe (`OR`) separated query

with_release_type int32 -2147483648 to 2147483647

possible values are: [1, 2, 3, 4, 5, 6] can be a comma (`AND`) or pipe (`OR`) separated query, can be used in conjunction with `region`

with_runtime.gte int32 -2147483648 to 2147483647

with_runtime.lte int32 -2147483648 to 2147483647

with_watch_monetization_types string

possible values are: [flatrate, free, ads, rent, buy] use in conjunction with `watch_region` , can be a comma (`AND`) or pipe (`OR`) separated query

with_watch_providers string

use in conjunction with `watch_region` , can be a comma (`AND`) or pipe (`OR`) separated query

without_companies string

without_genres string

without_keywords string

without_watch_providers string

year int32 -2147483648 to 2147483647
